Reflection certificate

Live lesson overview

Want to know whether the team pack anything special from home? Students can ask our presenters anything in this live Q&A session.

Preparation

If you have never joined a live lesson before use the guidance at <https://encounteredu.com/cpd/collections/encounter-live-support>, where you will find technical and educational support.

Live lessons work best when students have some prior knowledge and have prepared questions. Either teach a lesson from one of the Coral Oceans units linked on the left or choose a one-off Coral Live Prep lesson.

Questions generated by your class can be submitted via the Encounter Live tab in your Encounter Edu profile.

Learning objectives

- Recognise the importance of coral reefs
- Formulate higher order questions

Session steps

- 1. Setup**
Check that you can view live chats by testing any YouTube Live video. Ensure you have the correct materials for the Live Lesson.
- 2. Introduction (5 mins)**
The session will start with an introduction by the presenter(s) who will explain a little about the research being done at the CARMABI research centre.
- 3. Pre-submitted questions (40 mins)**
The presenter(s) will then attempt to answer as many of the pre-submitted questions from schools in addition to the questions coming in on the live chat, so listen out for your school's question. During this time students can complete their reflection certificate.
